Cesena | 10-12, January 2018

How Foodomics Contributes to the Selection of Biomarkers

Thursday, 11th January 2018

Edith Feskens

Wageningen University - The Netherlands

edith.feskens@wur.nl

Dr. Edith Feskens (1962) is professor of Nutrition and Health over the Lifecourse at Wageningen University, Wageningen, the Netherlands. She obtained her MSc in Human Nutrition from Wageningen University in 1987, and her PhD in Epidemiology from Leiden University Medical Faculty in 1991. After a career as cardiovascular and diabetes epidemiologist at the Netherlands National Institute of Public Health she returned to Wageningen to develop research in nutrition and the metabolic syndrome. Since June 2015 she is full professor and chair of Nutrition and Health over the Lifecourse at the same university, and since 2017 also responsible for the daily management of the Division of Human Nutrition. Her research focuses on diet, obesity and type 2 diabetes, ranging from molecular epidemiology to physiologic interventions and public health prevention programs. Part of her work is located in the developing countries, where under- and overnutrition co-occur. An important methodological topic is innovation in dietary assessment. She takes part in numerous European projects, and currently is a.o. vice-chair of the scientific advisory board of the JPI Healthy Diet for a Healthy Life, and PI of the JPI-HDHL project FoodBALL, the Food Biomarker Alliance. She has supervised > 45 PhD students towards completion of their theses and published > 450 international scientific papers. Her h-index is 80.

Presentation Title

“FoodBALL requirements for validating food intake biomarkers”

International Conference on Foodomics
